Option B Enter clients using PMX

Player Map enables people to instantly see "who is who" when creating their client relationship maps, making it easier to build + save your valuable client database – Player Map it

People entered on your Player Maps will be updated or created in Salesforce[®], so when Salesforce[®] usage is not what it should be, 2-way feeds Salesforce[®] ensuring you a much more accurate and complete database of your clients – one of the sustainable benefits of Player Map
